Strengthening the Multilateral Trading System to Promote Development and Inclusivity

The South Centre, Geneva; Centre for WTO Studies, Indian Institute of Foreign Trade, New Delhi; Third World Network, Geneva; Nelson Mandela School of Public Governance, University of Cape Town, South Africa; Trade & Industrial Policy Strategies, South Africa; and Trade Training and Research Institute, Cambodia, are jointly organising a series of interactive webinars on the overall theme of ‘Strengthening the Multilateral Trading System to Promote Inclusivity and Development’. The webinars will include trade talks and panel discussions by a former minister, current and former trade negotiators and eminent experts in the field of international trade on different aspects of multilateral trading system. The collective outcome of the webinars that will run from September to November 2020 will be a document containing an action-oriented agenda for developing countries.

Overall objective of the Interactive Webinars

Evolving an action-oriented agenda which would be in the interest of a large number of developing countries for strengthening the Multilateral Trading System so that it responds positively to their development aspirations.

Key outcomes of the Webinars

1. Identifying provisions in the WTO agreements that have proved to be significant constraints for developing countries in pursuing desirable economic policies, and recommending modifications that can realistically be achieved.

2. Identifying measures being implemented by the developed countries that provide them an unfair advantage in the market-place and recommending a framework for introducing/enhancing disciplines on such measures.

3. Despite heterogeneity of interests among many developing countries, identifying common ground among them and providing practical suggestions for building and sustaining coalitions.

4. Practical suggestions for helping developing countries to achieve their negotiating objectives, despite asymmetric economic and political power relationship between them on the one hand and the developed countries on the other.
Format of these Interactive Webinars

We will have invited speakers in each session. Thereafter, the audience will be given the opportunity to provide their inputs and also ask questions. We are looking forwards to lively discussions in these sessions.

Kindly note that this invitation is open to Geneva-based WTO delegates and also capital based officials. For others, participation will be based on invitation.
