## **CONCEPTUALISATION AND CREATION OF CWS SPS & TBT ONLINE PORTALS**

Conceptualised and created two web-based databases since the year 2003 on non-tariff measures (NTMs) like the Sanitary and Phytosanitary Measures (SPS) and Technical Barriers to Trade (TBT) measures notified since 1995 to the WTO. The web portals hosting the two databases came into existence in December 2009. The databases provide a detailed account of trade linkages in H.S. 4-digit terms for all SPS and TBT notifications made under the WTO by all the Members. It should be noted that most of these notifications, up to 80 per cent in terms of number, do not provide the trade link- there are close to 65,000 thousand such measures notified. The CWS databases provide information on the trade link up to 100 per cent of the SPS and TBT notified to the WTO by the members. The creation of the database web portal aims to help India's exporters better assess their market potential in the global scenario - increasingly, non-tariff measures like (SPS and TBT) have been replacing the role of tariffs in trade policy.

The comprehensive databases cover all the WTO members from January 1995 to December 2022.
