

Professional Bio

I am working as an Associate (Economics) at the Centre for WTO Studies, currently deputed at Department of Commerce in FT (NEA) division. My portfolio includes the preparation of briefs, presentations, and analytical data sheets for senior officials, regular assessment of trade reports to monitor export-import trends, and the formulation of substantive inputs for Senior Officials Meetings (SOM).

Holding a postgraduate degree in Computer Applications (MCA), I bring nearly three years of professional experience in trade policy and economic analysis, gained at the Ministry of Commerce and Industry, along with specialised training in trade negotiations and bilateral frameworks.

Notably, I participated in the 13th Round of the India-Korea Comprehensive Economic Partnership Agreement (IKCEPA) Upgrade Negotiations, held in Seoul in August 2026, contributing data-driven analytical support to India's negotiating position. I am presently engaged in preparatory work for the forthcoming round of IKCEPA negotiations, which is providing me with sustained insight into the strategic, economic, and diplomatic dimensions of bilateral trade agreements.
